EDUCATION

Cornell University

Bachelor of Arts in Computer Science, Mathematics — GPA: 3.88

Ithaca, NY

August 2023 – May 2026

EXPERIENCE

LLM Algorithms R&D Internship

LeYan Technologies

June 2024 – August 2024

Shanghai, China

- Led the configuration and optimization of Docker environments and GitLab CI/CD pipelines, reducing deployment time by **30%** for testing OneFlow (PyTorch's equivalent).
- Brainstorm & document **20+** use scenarios for **RAG+LLM** e-commerce product recommendation assistant.
- Extract **80k** potential QA from XHS.com (Chinese Instagram) product reviews on **100+** catalogs.
- Evaluate down to **50k** QA's for production with **prompt engineering** using OpenAI SDK + parallel computing.

Full Stack Software Engineer

Cornell CMSX

Sep 2024 – Present

Ithaca, NY

- Maintain Cornell's official CS course management system, used by **8,000+** students for efficiency and reliability
- Collaborate with a team of 12 on a project over **100k+** lines of legacy and new Java code under supervision of Professor Andrew Myers

CS 3110 Teaching Assistant

Cornell University, NY, USA

Aug 2024 – Present

Ithaca, NY

- Review and grade **3** midterm exams, **8** projects per semester.
- Held office hours **2 times** a week for **2** hours each debugging and explaining functional programming concepts to implement niche data structures.

Data Analytics & Applications

Cornell Electric Vehicles

Sep 2024 – Present

Cornell University, NY, USA

- Develop React application to aggregate real time status data of our EV supporting various visualizations.
- Create backend web sockets to receive data from EV sensors and emit to Heroku Postgres and React app

Full Stack Externship

ToSupply.cn

July 2023 – Aug 2023

Shanghai, China

- Implemented Jenkins pipelines and Spring Boot microservices to streamline the deployment of internal databases and authentication systems, supporting over **200+** employees and **1,000+** transactions.
- Contributed and submitted PRs to a mock React + Django full-stack application that automatically creates contracts for clients to sign.

PROJECTS

Jotion | *Next.JS, Convex, TailwindCSS, Zustand*

September 2024

- Developed a full-stack web application using with Next.JS for reviewing and editing documents and notes
- Integrated Clerk auth, Convex realtime database, and shadcn/ui for styling and custom components
- Utilize recursive React components, react hooks, providers, suspense fallbacks

My ML Lib | *Python, Numpy*

May 2024

- Implemented various machine learning algorithms including Multiheaded Attentions, Random Forest (decision trees), AdaBoost, Kernelized SVM, CNN.
- Wrote unit tests for these functions using CS 4780 Machine Learning material

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, OCaml, Java

Frameworks: React, Next.js, SvelteKit, Vue.js, Spring Boot

Developer Tools: Git, GitHub, GitLab, Docker, Kubernetes, Jenkins, Continuous Deployment, Jenkins

Libraries: Pandas, HuggingFace, PyTorch, TensorFlow, Pinecone, SQL (Postgres)
